

Task 1**What will be printed on the screen**

```
import numpy as np
list2 = [3,6,2,1,15]
a = np.array([list2])
b = 4
a1 = a > b
a2 = a >= b
print(a1)
print(a2)
```

Also, what will be the output when (i) b=6
(ii) list2 = [4,8], b = 4

Task 2**What will be printed on the screen**

```
import numpy as np
list2 = [1,4,8,10,5,2,7]
a = np.array([list2])
b = 4
a1 = a < b
a2 = a <= b
a3 = a == b
a4 = a != b
print(a1)
print(a2)
print(a3)
print(a4)
```

Also, what will be the output when (i) b=8
(ii) list2 = [2,4,8,5,4], b = 4
